Product Registration of Test Equipment — It is Important!

No matter what you purchase these days, manufacturers include product registration cards. Even inexpensive consumer products like Bluetooth head phones and toasters come with product registration cards. The volume of these we see with everyday purchases can drive one to a cynical viewpoint – All they want is to collect contact information for marketing purposes. This is undoubtedly true in some cases. However, test equipment is a different situation.

Did you know...

The U.S. now has more wireless than wired connections?

Although many in the fiber industry express concerns over the growth of wireless technologies, fiber optic backbones are still the most reliable and economical way to move that IP voice and data...
