

INSTRUCTOR SPOTLIGHT

Cameron Karch

Having been involved with communications since 1983 and specializing as a technician in both voice and data protocols, Cameron has performed project management and quality control tasks, in addition, to... [Continue Reading](#)

Clean Connectors Matter!

A high-performance fiber optic network requires low attenuation and low reflectance values to obtain the necessary bit error rate level. Unfortunately, all it takes is one contaminated or damaged connector to slow down or disrupt a transmission system... [Continue Reading](#)
