

Advanced OSP Technician

Intermediate

This four-day instructor-led course features one day of classroom theory that delivers a quick refresher on fiber terminology and technology before diving into FTTx, emergency restoration, fiber characterization, and how the latest industry trends may impact field practices. This is followed by three days of hands-on skills training, where attendees build and troubleshoot a passive optical network from patch panel to patch panel through various splice closures with multiple drops.

Audience: Fiber optic technicians, team leaders, installers, outside plant maintenance staff, or staff engineers

Prerequisite: Any Light Brigade foundational course such as Fiber Optics 1-2-3 or equivalent field experience

Credentialing

ETA® International Fiber Optics Technician—Outside Plant (FOT-OSP)

Valid for four years.

“I have now attended three classes taught by Light Brigade instructors and have enjoyed all of them. I have come out with more knowledge than going in. I look forward to more classes in the future.”

—Michael Bass, Opelika Power Services
