# V2 Fiber Blowing Machine

FOR CABLE 2.4 - 16mm / DUCT 7 - 50mm

The Jetting V2 Fiber Blowing Machine is a robust and compact pneumatic-operated fiber blower. A unique joystick controller provides optimal control of speed during installation. This machine can be configured for 2.4 to 16mm fiber cable and 7 to 50mm duct. Anodized aluminum construction makes the V2 both lightweight and easy to maintain.

FEATURES

- Pneumatic operation, dual motors
- Electronic counter for speed and distance
- Gentle operation with 450mm / 17.72" length belt
- Display for speed, distance, and pressure in duct
- Adjustable clamping force
- **NEW!** Joystick controller with forward and reverse functionality
- **NEW!** Duct air release valve: Allows quick release of air from the duct
- JetLogger-provisioned (JLP) version allows instant hook-up to the JetLogger Blown Fiber Documentation System (sold separately)
